Agenda

- EAC DLP and Unified DLP (MIP) background
- Migration benefits
- Phases & workflow
- Migrating EXO DLP policy/rules to MIP
- FAQs
- Q&A

EAC DLP – The most comprehensive Email DLP

- Available through the Exchange admin center
- Contains a rich set of predicates (conditions, exceptions, and actions) for granular email policies
- Use cases
 - DLP
 - Encryption
- Current adoption
 - More than 18k tenants
 - 10+ years

U.S. Patriot Act: Attachment not supported

Name:

U.S. Patriot Act: Attachment not supported

*Apply this rule if...

Any attachment's content can't be inspected

add condition

*Do the following...

Apply Office 365 Message Encryption and rights protection to the message with...

[Confidential \ All Employees](#)

add action

Except if...

add exception

Properties of this rule:

Priority:

1

☒ Audit this rule with severity level:

Medium

Choose a mode for this rule:

☐ Enforce

☐ Test with Policy Tips

☒ Test without Policy Tips

Cancel

Unified DLP Solution

- One stop solution for DLP needs across your digital estate
- Leverage the power of rich Microsoft Information Protection (MIP) suite - advanced classification & labeling
- Rich alerting experience & Incident Management

EAC DLP – Unified DLP Parity

Comparison of conditions and actions in EAC vs Unified DLP

- Seamless Migration
- Migration with finetuning
- Not supported/ Redundant*

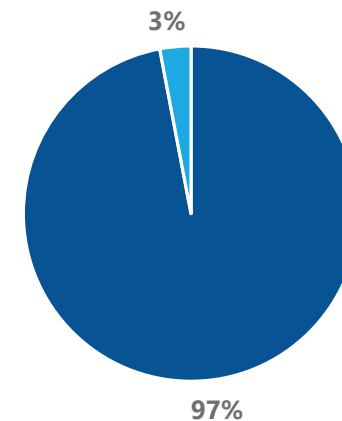

*These conditions/actions are either specific to mail flow, E.g. Spam Confidence Level Over (SCL Over) or redundant and can be achieved through other actions (E.g. Recipient in sender list)

- Seamless Migration
- Migration with finetuning
- Not supported/ Redundant*

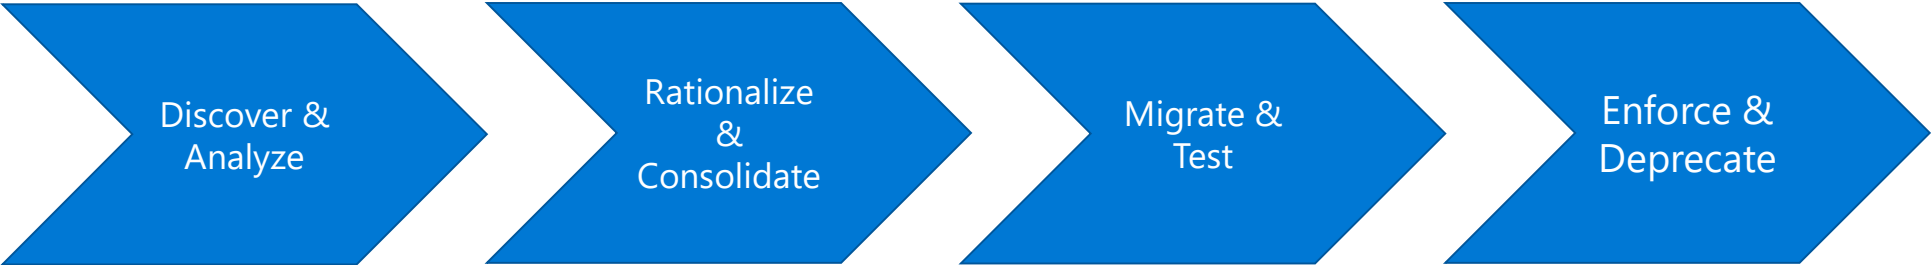

Migration Feasibility

- Seamless Migration
- Post Migration fine-tuning required

- Current parity enable 97% of tenants to migrate with a single click
- 3% tenants are using unsupported predicates and need post migration steps.

Migration Playbook

Data loss prevention

Show in navigation

Policies Alerts (preview) Endpoint DLP settings (preview)

Use data loss prevention (DLP) policies to help identify and protect your organization's sensitive info. For example you can set up policies to help make sure information in email and docs isn't shared with the wrong people. [Learn more about DLP](#)

+ Create policy (preview) ↓ Export ↺ Refresh

Frequently asked questions

Question	Answer
Are ETR (mail flow rules) being deprecated?	No changes planned for mail flow rules. Only Exchange DLP will be deprecated
Will the migration wizard impact my existing DLP policies in Exchange?	No. The migration wizard only creates new policies in compliance center. You can choose to disable the Exchange policies using the wizard or independently.
Why am I not seeing the migration wizard banner?	Migration wizard banner will be displayed only if you have active Exchange DLP policies
What should I do if there are any failures in migration?	Check details in migration report to understand the root cause. Make required edits in Exchange policy and retry migration using the wizard
Why am I getting 2 incident reports?	This is expected in case both Exchange and M365 DLP policies are in enabled state
What should I do if my rules are using unsupported conditions?	Create a mail flow rule for conditions like SCLOver which are not supported in Unified DLP (M365 DLP)
Discrepancy in Exchange and M365 DLP policy evaluation	If policies are enforced in both Exchange and M365 DLP, please refer to this document to understand the expected behavior

Frequently asked questions

Question	Answer
What happens, if I don't move my EAC-DLP policies and deprecation time lines reaches	You will receive a message center post with the required details
Can I continue my policies in both EAC and DLP-EXO?	While the rules can be maintained in both places, it will lead to unexpected behavior due to conflict in ETR & DLP actions
I don't see, EAC-DLP screen in my tenant	May be New tenant or all policies are in disabled state. You are good
If our condition is not available in DLP, can we continue that policy as-is in EAC?	Pl provide more details to ETRtoDLPmigration team
I don't see any clear deprecation timelines (dates) in documentation	Customers have been informed through message center post MC278896 for deprecation between March-June2022
Where do I find the recording for this session?	Please refer next slide or visit https://aka.ms/mipc/oss
